

You can dry things under the photovoltaic panels

Overview

After rinsing, let the area beneath the solar panels dry naturally by letting it air dry. Scrub the panels with a soft brush and gentle cleaner, like dish soap and water. This buildup creates a significant fire hazard, especially on homes with composition shingle roofs, which are at a higher risk due to. Cleaning under solar panels involves removing any debris like leaves or branches that may have collected there. You can use a long-handled broom or air blower to gently remove the debris without damaging the panels.
